DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I comprising the species of claim 1 in the reply filed on March 26, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 2-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species or group, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on March 26, 2005.

Specification Objections

3. The disclosure is objected to because of the following informalities: it fails to contain a brief description of the drawings. See MPEP § 608.01(f). A reference to and brief description of the drawing(s) as set forth in 37 CFR 1.74.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it is unclear as to what is meant by "effective methylene length".

In claim 1, it is unclear as to whether or not the 6 carbon atoms of the cyclohexyl ring count towards the "effective methylene length".

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by DE 3829455 A1 (see english abstract).

The reference is directed to the preparation of benzenesulfonamidoalkylcyclohexane compounds and their use as pharmaceuticals. As per the english translation thereof, cyclohexanepropanoic acid, 4-(2-aminoethyl) is used in the preparation thereof.

Cyclohexanepropanoic acid, 4-(2-aminoethyl) meets the presently claimed cyclohexyl based rigid ring amino acid because it has an effective methylene group of 8 and a carbon number of 11.
